

## **Best Practices of the Department**

- **1. Industry-Integrated Learning through Certificate Courses and Experiential Exposure**  
The department strengthens academic learning by offering **value-added certificate courses** in emerging and industry-relevant areas such as **Advanced Excel, Digital Marketing, C Programming, and Basic Web Designing**, developed in collaboration with industry experts. These initiatives are further supported through **hands-on workshops, live projects, internships, and expert guest lectures**, providing students of commerce and information technology with practical exposure, industry insights, and enhanced employability skills.
- **2. Technology-Enabled Teaching and Holistic Student Mentoring**  
The department adopts a **student-centric and technology-driven approach** by ensuring continuous academic monitoring and personalized mentoring through **Mentor–Mentee Meetings, academic review mechanisms, and remedial classes**. This practice supports inclusive learning, skill enhancement, and overall academic progression of students.
